

# CRISIS RESPONSE

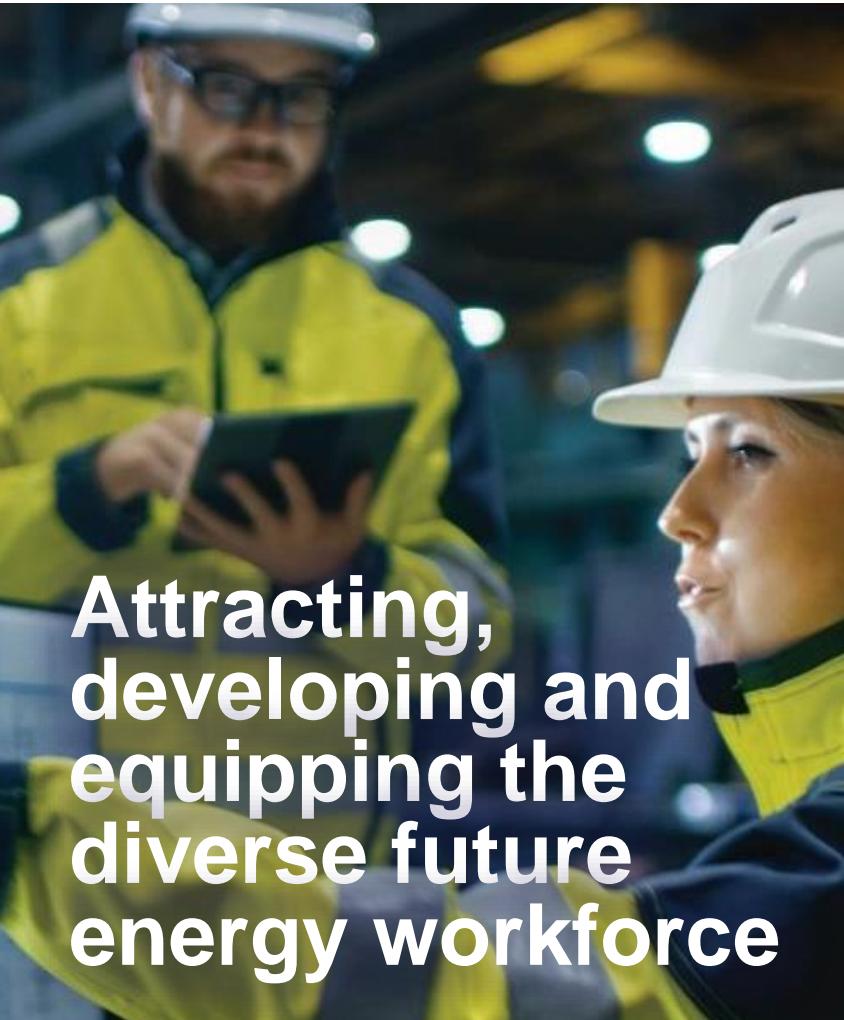

Nick Wayth CEng FEI  
CEO, Energy Institute

# Creating a better energy future

for our members and society by accelerating  
a just global energy transition to net zero

Attracting,  
developing and  
equipping the  
diverse future  
energy workforce

Informing energy  
decision-making  
through convening  
expertise and  
advice

Enabling industry  
and consumers to  
make energy lower  
carbon, safer and  
more efficient

# Headlines

## Top challenges

Rank	Challenge	Change since 2021
1	Energy price crisis	↑ 19
2	Low carbon energy	↑ 4
3	Supply security	↑ 13

## Top solutions

**Energy  
efficiency**

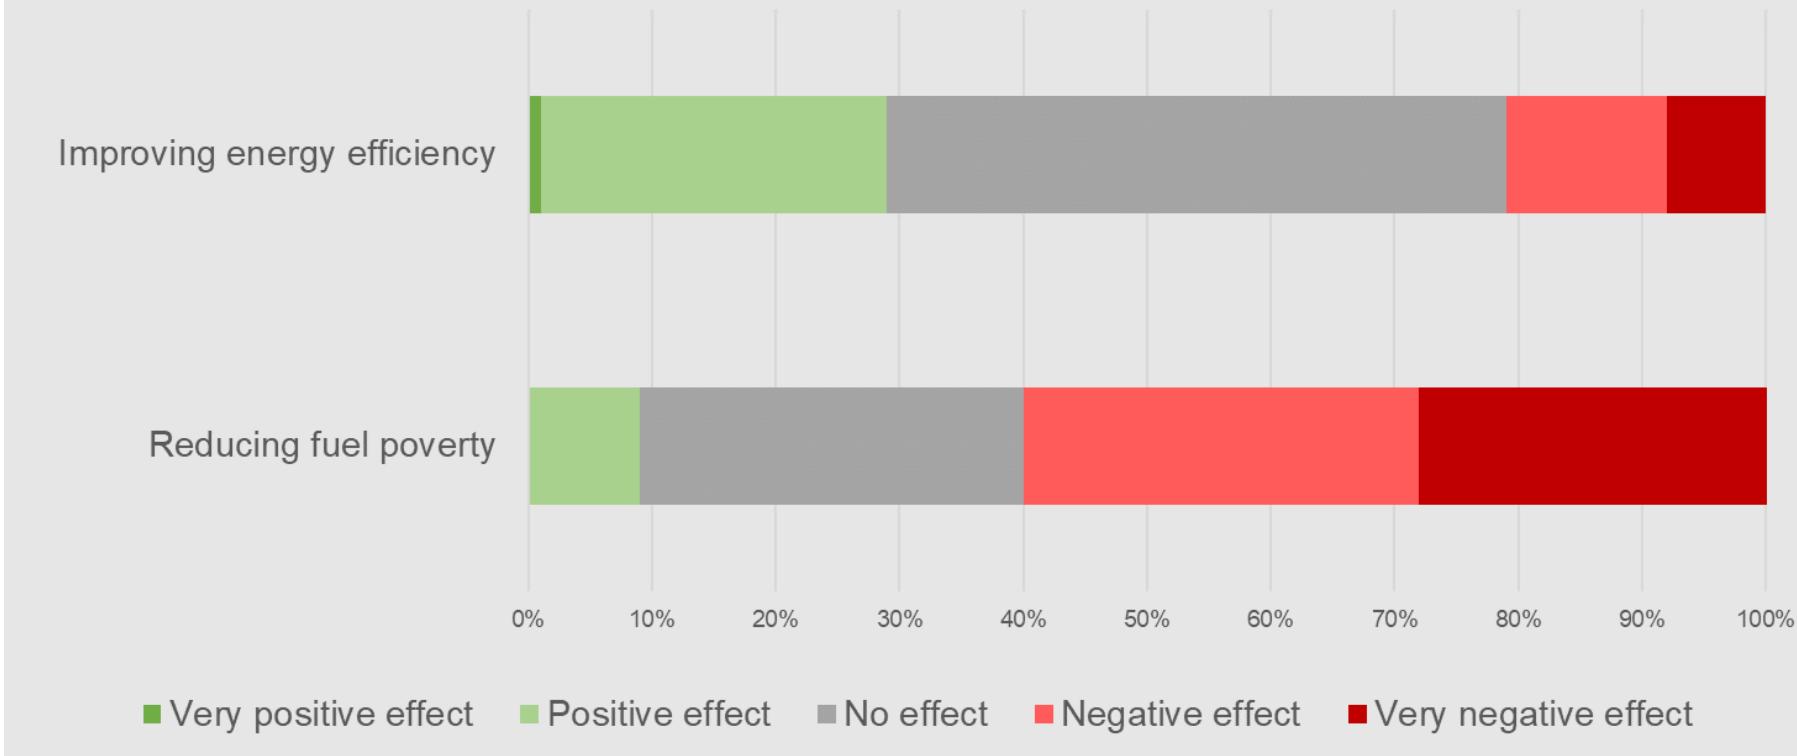

**Renewables**

# Efficiency policy is failing

What effect do you think the UK energy policy has had on each of the following areas in the last 12 months?

#EnergyBarometer

# Clear recommendations

## 1. Help now for the most vulnerable

Ahead of this winter, subsidies for the lowest income homes

## 2. A nationwide retrofit programme

Get all homes to energy performance rating C or above, with subsidies provided where necessary

## 3. Tailored advice and information

Government-backed behaviour change campaigns to help householders manage energy use

## 4. Skills investment

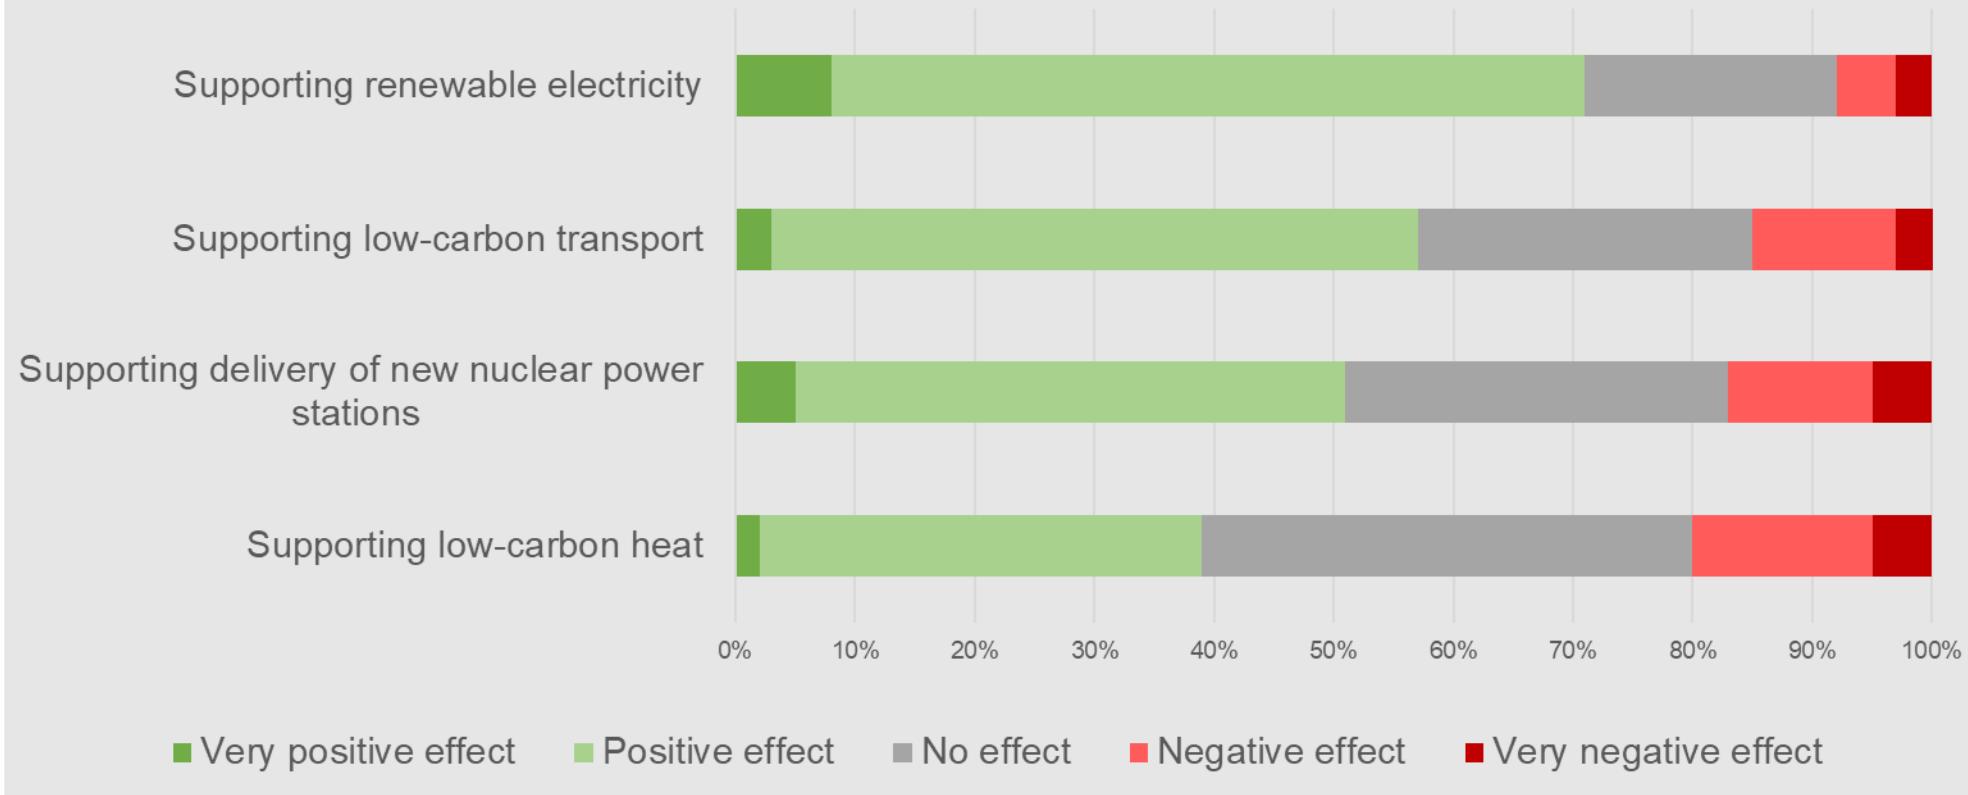

Prioritise green jobs in the homes and buildings sector

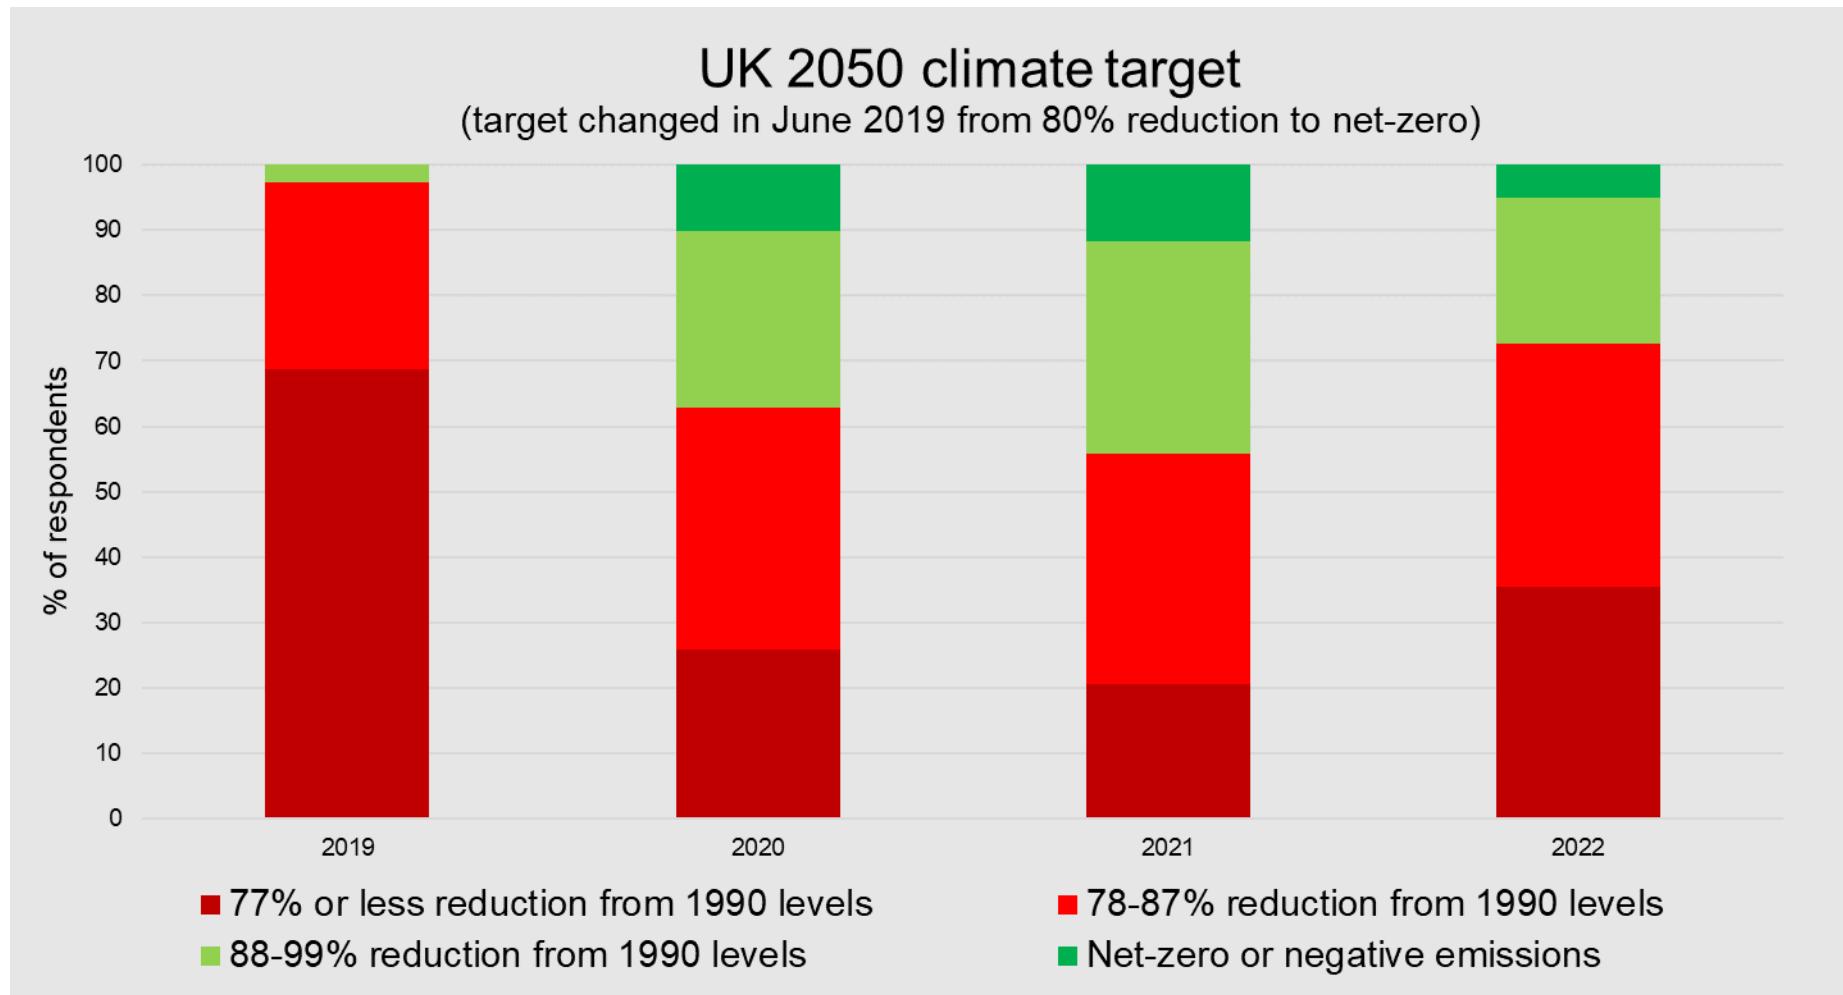

#EnergyBarometer

# Low-carbon energy

What effect do you think the UK energy policy has had on each of the following areas in the last 12 months?

# Net zero
